

## Dorsey Isolation and Quarantine Policy

*Updated 2/21/2022*

### **Purpose:**

Dorsey's Quarantine and Isolation policy was developed in accordance with the Michigan Department of Health and Human Services (MDHHS) [guidance](#), in an effort to minimize the spread of COVID-19.

### **Positive Case – Isolate:** (regardless of vaccination status)

**Stay home and away from others for at least 5 days.** Day 0 is your first day of symptoms or a positive test. Day 1 is the first full day AFTER day 0 (the day your symptoms developed or the day you completed your PCR or rapid test). If you do not develop symptoms or your symptoms are getting better, you can end isolation after 5 full days.

### **Close Contact – Quarantine:** (close contact is defined as being within 6 feet of a confirmed covid case for 15+ minutes)

If you are fully vaccinated **AND** boosted (if eligible), OR if you tested positive for COVID-19 in the last 90 days, you do NOT need to quarantine unless you have symptoms. Testing is recommended five days after exposure.

If you are unvaccinated, OR not fully vaccinated, OR not boosted (if eligible) **stay home and away from others for at least 5 days.** A negative COVID test result must be provided before returning to campus or a full 10-day quarantine will be required. Testing is recommended five days after exposure.
